BURLINGTON PUBLIC WORKS

SNOW AND ICE CONTROL PLAN

SNOW AND ICE CONTROL PLAN

The purpose of this plan is to define the operational procedures and best management practices (BMP’s) for storing and utilizing snow and ice control materials, and for performing winter maintenance activities. It defines the level of service that Burlington Public Works will strive to provide on our 95 miles of streets and 127 miles of sidewalks.

Since storms vary dramatically and occur during a variety of traffic conditions, this Snow and Ice Control Plan is intended to be flexible. It is a guide structured to fit average conditions, but able to accommodate the wide variety of conditions that will be encountered by maintenance crews who are working to maintain safe roads and conditions.

STORM WARNING NOTIFICATION

The Department of Public Works Right of Way uses multiple weather services available online, such as National Oceanic and Atmospheric Administration (NOAA) and the Weather Channel. DPW will issue storm related public service announcements via the local media, Facebook, Twitter, and Front Porch Forum. Sign up for an email or text by going to:

Email; burlingtonparkingban-subscribe@yahoogroups.com

Phone: 802-658-SNOW

Burlington Public Works has also invested in (4) new traffic message boards stationed along North Avenue and the intersection of Main Street and Prospect Street that will warn residents of any winter parking bans.

PERSONNEL SCHEDULING

Our Right of Way crew of (18) full time Street Maintenance and (2) seasonal employees maintain the streets and sidewalks. Large storms may require around the clock coverage. This will require help from outside work groups and departments. The Street Maintenance Manager will find volunteers during the normal workday and create a plan based on the available manpower and weather conditions. The plan will be reviewed by the Assistant Director of Right of Way before implementing.

MOBILIZATION

When the decision has been made to react to a storm, the Street Maintenance Manager will mobilize the crew. Since all trucks, tractors and routes are assigned, all the employees need is the call to deploy. If a storm event is predicted after normal business hours, the personnel will be put “on-call” per the union contract and the on-call employees will make themselves available by telephone. The department is aware that employees may have personal needs that may arise and

	<p>POLICY & PROCEDURE MANUAL</p> <p>Title: Snow and Ice Control Plan</p>
<p>Effective Date: 11/16/17</p>	<p>Approved by:</p>
<p>Number: 26.2</p>	<p>Signature:</p>

may not be able to be “on call” at all times. If an employee has a personal issue, they may address it with their direct supervisor.

While DPW Street Maintenance is tasked specifically with the staffing for snow and ice control operations, the employees of the Fleet Maintenance group have a responsibility to assist with equipment repairs. Once the decision has been made to respond to a storm event, during normal working hours the street Maintenance Manager will notify the Fleet Manager. The Fleet Manager will then schedule his employees to provide maintenance assistance. After normal working hours, if the foreman in charge determines that the streets and sidewalks need to be plowed he will call the “on-call” maintenance team.

SNOW AND ICE CONTROL MATERIALS

Road salt (NaCl) is the primary snow and ice control material. The salt is purchased under the State of Vermont contract. FY15 the contract was awarded to Cargill; the local distributor is Barrett’s Trucking in Burlington @ 863-1311. DPW uses approximately 3500 tons of road salt per year. The Street Maintenance Foreman is responsible for the ordering and inventory of the salt. The entire salt inventory is stored at 645 Pine Street. Liquids like magnesium chloride (MgCl2) are being used on a small scale until we further understand their benefits. Safety Data Sheets (SDS) are available in a binder in every truck and in the SDS binder located in the Street Maintenance area.

Burlington Residents are permitted to take (1) 5-gallon bucket of salt per winter season. This courtesy is extended to single family residents only; sorry no property managers are authorized to take any salt.

	<p>POLICY & PROCEDURE MANUAL</p> <p>Title: Snow and Ice Control Plan</p>
<p>Effective Date: 11/16/17</p>	<p>Approved by:</p>
<p>Number: 26.2</p>	<p>Signature:</p>

EQUIPMENT INSPECTION

All City equipment; to include all plow trucks, loaders, and sidewalk tractors will be operator level inspected before any snow operations. Immediately following a storm on the next regular business day, all equipment will be cleaned, greased, fluids levels checked, and a proper preventive maintenance check per the manufactures operator manual. All deficiencies will be reported immediately to DPW Fleet Services.

EQUIPMENT CALIBRATION

Every November, all truck spreaders and computerized spreader controls will be calibrated with salt (NaCl) per the manufactures operation manual. After every storm event, each truck will have the mileage and pounds per lane mile recorded. This task will be assigned to a working foreman and one other street maintenance worker.

TRAINING OF PERSONNEL

Training is a key part to our snow plans success. All operators are properly trained before using any equipment utilizing operator manuals, manufacturers trainers, our in house trained employees, and on the job training. All employees will be able to properly operate, and maintain the equipment before actually plowing snow. Before the first snow storm, all operators will drive their route, getting familiar with obstacles such as high manholes, trees, narrow roads, mailboxes, etc. Any reported obstructions will be reported to the Right of Way Inspector for further action. Every truck has a binder with all route maps, bike routes, CCTA emergency routes, and the list of dead end roads.

	<p>POLICY & PROCEDURE MANUAL</p> <p>Title: Snow and Ice Control Plan</p>
<p>Effective Date: 11/16/17</p>	<p>Approved by:</p>
<p>Number: 26.2</p>	<p>Signature:</p>

SNOW ROUTE ASSIGNMENT

All operators will be assigned a route, whether it is in a truck or a sidewalk tractor. Continuity is important in assigning routes and equipment. Operators will learn the best way to battle snow and ice if they are doing the same streets every storm and will know areas that need special attention such as bridges, on and off ramps, hills, curves, and school zones. The same with the equipment, the operators in the same truck or tractor will know how it handles and what the vehicles limits are.

The sizes of the routes are designed for the City’s fleet of trucks and tractors. There are 10 large trucks, 1 small truck for dead ends and narrow streets, and 11 tractors. Of the 10 large trucks, 1 is a spare in case of a break down. With the 11 tractors, 2 are spares. Depending on the accumulation of snow, it could take an operator with a large truck approximately 5-7 hours to plow their route once. An operator on a sidewalk route will take approximately 6 hours to plow their route, if they are salting at the same time it will take 8-9 hours to complete once.

LOADING PROCEDURES

The loading of salt in all trucks will be by the oldest available loader in the fleet. The operation will be conducted by qualified City employees only. The trucks will

	<p>POLICY & PROCEDURE MANUAL</p> <p>Title: Snow and Ice Control Plan</p>
<p>Effective Date: 11/16/17</p>	<p>Approved by:</p>
<p>Number: 26.2</p>	<p>Signature:</p>

be loaded to their max GVWR and not overloaded. A scale is located in the loader and will be calibrated before the winter season. The loader will have operator level preventive maintenance after every storm event and all loading procedures will be supervised by an assigned working foreman.

SPREADING AND PLOWING PROCEDURES

Salting Operations

Streets will be salted during light storms where minor accumulations of snow are expected. This requires the use of 6 large trucks that will salt the primary streets with priorities going to the routes coming into and exiting the City, primary roads leading into neighborhoods, school zones, downtown, and intersections. Not every street is salted unless there is a prediction of ice.

Plowing Operations

Plowing of the streets is the same regardless of the amount of snow predicted. The City owns (10) large plow trucks with (1) being used as a spare in case of break down and (1) small truck for dead ends and narrow streets. We can add plows to our (2) front end loaders for additional help in major storms.

The (9) large plow trucks are assigned a route and each route starts with its primary street, leading to its secondary main, and then into the neighborhood streets. (Truck route maps appendix B.) The (1) small plow

	<p>POLICY & PROCEDURE MANUAL</p> <p>Title: Snow and Ice Control Plan</p>
<p>Effective Date: 11/16/17</p>	<p>Approved by:</p>
<p>Number: 26.2</p>	<p>Signature:</p>

truck is assigned a list of narrow and dead end streets. (Narrow and dead street list appendix C.)

Sidewalk Plowing and salting

There are (9) sidewalk routes and are plowed during the day concurrently with street plowing. Extra attention is given to the downtown, Old North End, areas around schools and school crossing guard locations.

During a night time snow push back or any night time plowing operation, sidewalk plowing usually starts around 3 a.m. so that the sidewalks are open when school begins. This time could vary depending on the size of the storm.

If the storm exceeds 12” of snow and there are snow banks along the sidewalk, we will have to snow blow every sidewalk. This will take considerable time and manpower. This operation could take up to 24 hours or more. Again the priorities are downtown, Old North End, and school zones. We normally have many equipment failures while snow blowing, so having fleet services available is key.

We routinely plow, scrape, and sometimes salt the sidewalks during the day to maintain a safe environment.

	<p>POLICY & PROCEDURE MANUAL</p> <p>Title: Snow and Ice Control Plan</p>
<p>Effective Date: 11/16/17</p>	<p>Approved by:</p>
<p>Number: 26.2</p>	<p>Signature:</p>

Accessibility (Handicapped) Parking Spaces

Burlington has a large amount of handicapped parking spaces that must be cleared of snow. This will take place once the streets and sidewalks have been cleared. After the storm, the department will start clearing the spaces starting from the downtown, working their way to the outskirts of the city. With the limited amount of manpower available it may take many days before all spaces can be cleared of snow. If a resident has a particular handicap parking space that needs immediate attention, please call DPW Customer Service @ 863-9094.

Bike lanes

Burlington has 7.75 miles of dedicated bike lanes throughout the City. They are all on major truck routes and the lane will be plowed to the curb. After the roads and sidewalks are cleared, DPW will dispatch a sidewalk tractor and clean the bike lane free of snow. (Appendix A)

CCTA Bus Routes

	POLICY & PROCEDURE MANUAL Title: Snow and Ice Control Plan
	Effective Date: 11/16/17 Number: 26.2

Burlington is a major hub for public transportation. Many of the priority routes are also major routes for the CCTA public transportation system. The operators are familiar with their routes and understand the importance of the public transportation system. We routinely review the routes with the DPW Drivers.

Performance Capabilities

As stated earlier, Burlington has 95 miles of roads and 127 miles of sidewalks. During the average year we receive 80 inches of snow. Of course this is only an average and what really matters is when it falls, and how many snow events we have to deal with. Generally speaking, the length of the storm rather than the amount of snow determines how we deal with it. Our plans are built around these capabilities.

Street plowing routes	10
Hours to plow every street once	5 to 7
Hours to salt all streets @ 500 lbs. mile	4
Sidewalk plow routes	9
Hours to plow every sidewalk once	8
Hours to snow blow every sidewalk once	24
Hours to salt every sidewalk	12

SNOW STORAGE

	<p>POLICY & PROCEDURE MANUAL</p> <p>Title: Snow and Ice Control Plan</p>
<p>Effective Date: 11/16/17</p>	<p>Approved by:</p>
<p>Number: 26.2</p>	<p>Signature:</p>

Snow removed from the City streets, greenbelts, parking lots, and parking meter spaces will be stored at 702 Lake Street in Burlington. This area is for the storage of City removed snow and not for any private contractor, unless contracted by a City department. This site is a former oil tank farm near the waterfront and has been an ideal storage area as the berm keeps contaminants from reaching the lake. This storage area will be cleaned of any trash and debris every spring.

SNOW OPERATION DAMAGES

1. Mailboxes and other structures within the Right-of-Way

Occasionally mailboxes and other property may be damaged by snow plowing operations due to poor visibility, the mailbox being buried in a snow bank or the weight /volume of snow being plowed. The damage is not deliberate and in most cases unavoidable. Burlington Public Works is not responsible for damage and does not repair, replace or re-erect mailboxes that are located within the right-of-way unless physically struck by a DPW plow truck. In these cases, the property owner shall submit a claim to the City for reimbursement. All mailboxes must be installed to the USPS standards.

Many residents have basketball nets in the right of way, these not only interfere with plowing to the curb, but during inclement weather the plow operator may not see the basketball net and damage the basketball net and City equipment. The City will not be responsible for any damages to basketball nets within the right of way. If any basketball

	<p>POLICY & PROCEDURE MANUAL</p> <p>Title: Snow and Ice Control Plan</p>
<p>Effective Date: 11/16/17</p>	<p>Approved by:</p>
<p>Number: 26.2</p>	<p>Signature:</p>

nets are found in the right of way, the DPW Excavation Inspector will be notified and will have it removed.

While removing the snow from the sidewalks we find many fences, borders and decorative landscaping close to the sidewalk. This presents quite a challenge for the department to operate the tractors safely. We ask that all landscaping be built at least 12” from the sidewalk in order to minimize damage to private and city property. Burlington Public Works will not be responsible for any damages to landscaping or fences that are within 12” of the sidewalk. All reported damage will be inspected by our Right of Way Inspector, and if the inspection finds the City responsible, an insurance claim will be made with our agent.

2. Plantings in the right of way

Snow removal from the streets and sidewalks are a challenging task and there are many obstacles that the operators have to maneuver around, and the major items being trees and shrubs. While great care is taken not to damage the tree or shrubbery, the property owner must maintain the vegetation so it does not impede the right of way. While the City equipment may damage the vegetation, the trees and shrubbery may also damage the equipment. **The department will not be responsible for any damage to any plantings encroaching on the right of way.**

3. Accident Protocol

Plowing snow in a large truck with a wing plow takes a special skill. Public Works employees are highly skilled and properly trained before

	<p>POLICY & PROCEDURE MANUAL</p> <p>Title: Snow and Ice Control Plan</p>
<p>Effective Date: 11/16/17</p>	<p>Approved by:</p>
<p>Number: 26.2</p>	<p>Signature:</p>

they operate any commercial vehicle. Vehicle accidents will happen, and when they do, the following must happen:

- a. Stop vehicle in a safe area.
- b. Check all people involved for injuries. Call 911 if needed.
- c. The DPW employee will call their supervisor either by cell phone or by 2-way radio and inform him of the situation.
- d. Supervisor will call the Burlington Police Department. A police report will be taken, the DPW employee will receive a copy of the report, if the report is not available, you are required to obtain the incident number.
- e. If the vehicle is able to be driven, it must report to DPW Fleet Services for an evaluation before continuing on with snow plow operations.
- f. All accidents must be reported to the Right of Way Assistant Director and the insurance company. The Foreman or Assistant Director will report all the proper information on the Travelers Insurance Portal.

PARKING LIMITATIONS

Burlington does not have a seasonal parking ban like most towns in our region. It is the responsibility of the Public Works Director to declare a winter parking ban. Parking bans are declared on a case by case basis. Criteria for a parking ban include length of storm, amount of snow during the storm and how much snow is already on the streets and has not been plowed to the curb. By City ordinance

	<p>POLICY & PROCEDURE MANUAL</p> <p>Title: Snow and Ice Control Plan</p>
<p>Effective Date: 11/16/17</p>	<p>Approved by:</p>
<p>Number: 26.2</p>	<p>Signature:</p>

20-56 the ban must be declared by 3p.m. in order to be in effect by 10 p.m. that evening until 7 a.m. the following morning.

Parking Ban Notification

Parking bans are warned in the following manner:

1. Using the City maintenance light system
2. Sending a press release to all local radio and television stations, and the Burlington Free Press
3. Posting alerts on social media, such as Facebook, Twitter, and Front Porch Forum.
4. Sending out text messages and e-mails via GovDelivery
5. An up to date recording on 658-SNOW

Once the Director calls a ban, the street maintenance foreman will notify the parking enforcement supervisor, who is responsible for the enforcement of the winter parking ban. Second, he will activate up to 90 plus flashing parking ban lights. These lights are located at the entrances of the City, important intersections, and throughout the City’s neighborhoods. They are a visual warning to the residents that a parking ban is in effect.

The DPW foreman in charge of the plowing crew will meet with the parking enforcement crew at 9:30 p.m. at the police department to review and cover any last details.

Vehicles must be off of the streets during these hours if a ban is declared or they will be towed. While parking bans make it easier to plow snow, it is difficult for some people to find alternative parking. DPW does offer free parking in the City

	<p>POLICY & PROCEDURE MANUAL</p> <p>Title: Snow and Ice Control Plan</p>
<p>Effective Date: 11/16/17</p>	<p>Approved by:</p>
<p>Number: 26.2</p>	<p>Signature:</p>

owned parking garages as an option. Parking is available in the Marketplace Garage and the Macy’s Garage on the lower decks only. Vehicles must be removed by 7:30 am or they will be charged the full day's rate. Additional information can be found at <http://www.burlingtonvt.gov/>.

While a winter parking ban is not called for every storm, if residents have access to off street parking, we urge them to use it. Additional information can be found at <http://www.burlingtonvt.gov/Police/Winter-Parking>.

The City has 4 designated tow areas.

Lake St. boat launch: Vehicles towed from the Old North End and west of Willard St. from Pearl St. to Maple St.

Grove St. Shamanski Park parking lot: Vehicles towed east of Willard St. from Maple St. to the New North End.

Gosse Court, North Ave to the end: Vehicles towed from the New North End.

Oakledge Park parking lot: Vehicles towed from the south end and west of Willard St. from Maple St. south.

When the lots are full, vehicles found on the street could also be towed to the nearest street the Public Works Department designates as a drop-off point. This would be a street that has been cleared of snow. For car owners to find their vehicle, please call (802) 540-2380.

AFTER STORM RESPONSIBILITIES

	<p>POLICY & PROCEDURE MANUAL</p> <p>Title: Snow and Ice Control Plan</p>
<p>Effective Date: 11/16/17</p>	<p>Approved by:</p>
<p>Number: 26.2</p>	<p>Signature:</p>

It is expected that 12 hours after a snow storm that every City street will have been plowed. The Street Maintenance Foreman will inspect every City street to ensure that the streets are cleared and passable. The department will continue to patrol the streets and maintain them to be safe and passible. It is possible that the downtown and some narrow streets may have to have the snow removed. If this service is needed, it will happen approximately 2-3 days after the storm using City owned equipment. Snow removal downtown usually happens in the early morning hours. For the narrow and dead end streets, we will post the streets for “no parking” and remove the snow during the day.

SNOW RELATED CITY ORDINANCES

27-84 Throwing snow into street prohibited.

No person shall throw or put, or cause to be thrown or put, snow or ice in the part of the street known as the travel portion nor on a sidewalk of a street.

(Rev. Ords. 1962, § 4303; 1969 Cum. Supp., § 4303)

27-2 Enclosing highway; erecting fence or encroachment; nuisance.

No person shall enclose a part of the highway or street, or erect a fence, building or other encroachment, or make **obstructions**, or create a nuisance on a highway or street, or continue such enclosure, fence, building, encroachment or nuisance on a highway or street.

(Rev. Ords. 1962, § 4209)
